Short Assignment: Understanding Correlations

Correlational studies show relationships between variables. If high scores on one variable predict high scores on the other variable, the correlation is *positive*. If high scores on one variable predict low scores on the other variable, the correlation is *negative*.

Showing that two variables are related does not justify claiming that a causal relationship exists. There may be a causal relationship, but other explanations usually exist. For example, the variables may be related because both have a causal relationship with a third variable.

For each of the correlational studies described below, decide whether the correlation is positive or negative and give two alternative explanations for each finding.

 A study of married couples showed that the longer they had been married, the more similar their opinions on social and political issues were. (10 marks)
 Positive or negative?

Explanation 1:

Explanation 2:

2.	An intelligence test was given to all the children in an orphanage. The results showed that the longer children had lived in the orphanage, the lower their IQ scores. (10 marks) Positive or negative?
	Explanation 1:
	Explanation 2:
3.	In a study of American cities, a relationship was found between the number of violent crimes and the number of stores selling violence-depicting pornography. (10 marks) Positive or negative?
	Explanation 1:
	Explanation 2:
4.	A college professor found that the more class absences students have, the lower their grade in the
	course tends to be. (10 marks) Positive or negative?
	Explanation 1: Explanation 2:

5.	It was found that elementary-school children who made high scores on a vocabulary test also tended to make high scores on a test of physical strength and muscular coordination. (10 marks)
	Positive or negative?
	Explanation 1:
	Explanation 2:

Critiquing Different Theories

You have learned Erikson's Psychosocial Theory and Piaget's Stage Theory on human development. List, with explanations, THREE points of strength and THREE points of weaknesses of these 2 theories in about 400-500 words. (50 marks)
